Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Response to Amendment

Applicant's request for reconsideration of the finality of the rejection of the last Office action is persuasive and, therefore, the finality of that action is withdrawn.

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Esposto US Patent No. 5,743,325. Referring to claim 1, Esposto discloses flexible heat transport design for deployable radiator applications that comprises a first and second opposite facing payload radiators 14 and 16 (see figure 1); first and second opposite facing deployable radiators 10 and 12 (see figure 1); and one or more coupling heat pipes 20 that cross couple opposite facing payload and deployable radiators (see figure 1).

Referring to claim 2, Esposto shows that the one or more coupling heat pipes 20 comprise loop heat pipes (see col. 2 lines 58-67 and col. 3 lines 1-3).

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 3, 4 and 5 are rejected under 35 U.S.C. 103(a) as being unpatentable over combined teachings of Esposto US Patent NO. 5,743,325 and Caplin US Patent No. 5,806,800.

Esposto discloses the applicant's invention as claimed with the exception of providing a body and a plurality of solar arrays.

Caplin discloses a dual function deployable radiator cover that does provide a body 12 (see figure 1) and a plurality of solar arrays 18 (see figure 1). Therefore it would be obvious to modify Esposto's invention by providing a body and a plurality of solar arrays in order for the invention to function properly.
